Thank you Amy. If you guys could walk through the transloading process up front, that would be most useful.

**Where:** R10Sea-Room-21Shoshone-Expand/R10-Rooms-Service-Center

All

Ryan had asked awhile back about the requirements EPA would have for EMJ's transloading facility. Because the transloading facility EMJ is currently considering is within the LDW site- EPA requirements will be based on substantive requirements of TSCA and the CWA. If folks are available and able to meet and start going over what those are- let's sit down on Tuesday afternoon to discuss. I have scheduled this for a half an hour as I don't know if folks are available until 4. If there is interest and availability- I'll extend it to 4.

Thanks

Becky
